

European SCGIS Conference, May 21-23, 2012, Sofia, Bulgaria

New Horizons for GIS Users with Esri GIS Technology

*Miglena Kuzmanova
Business Development Expert*

Vision

GIS – understanding our world

GIS Is Changing Rapidly

Coevolving with Other Enabling Technologies

Helping Us Understand Our World

A New GIS Pattern Is Emerging

Making GIS Accessible to Everyone

... Virtually Anywhere and on Any Device

Will This New Pattern Be Adopted Broadly?

GIS Professionals

This Pattern Will Open and Extend GIS

Providing Access to the Vast Network of Geographic Knowledge

*Extending the Reach of GIS . . .
Empowering Others to Participate . . .
. . . Providing Shared Understanding*

Our Work

ArcGIS 10.1. – A Complete GIS Platform

Desktop, Server, Web, Cloud

ArcGIS Supports Multiple Implementation Patterns

Working Independently and As An Integrating System

Enabling Enterprise and Pervasive GIS

ArcGIS Is Advancing Rapidly

Introducing Many New Capabilities – Improving Quality, Performance, and Usability

ArcGIS Includes a Growing Collection of Basemaps & Content

Ready to Use, Authoritative and Beautiful

Landsat Services

Imagery

World Ocean Map

Census

World Street Map

National Geographic World Map

World Topographic Map

Advances Geographic Science

New Analytic Tools Providing New Insights

Multi-scale Spatial Auto Correlation

Empirical Bayesian Kriging

Areal Interpolation

Grouping Analysis

Space/Time Cluster

Exploratory Regression

Fast Drive Time Analysis

Geodesic Buffers

... Creating Better Understanding

Advances Mapping and Editing Workflows

Increasing Productivity

Dynamic Legends

Map Automation with Python

Temporal Support

Better Labeling

Rule-Based Generalization

Improved Template Based Editing

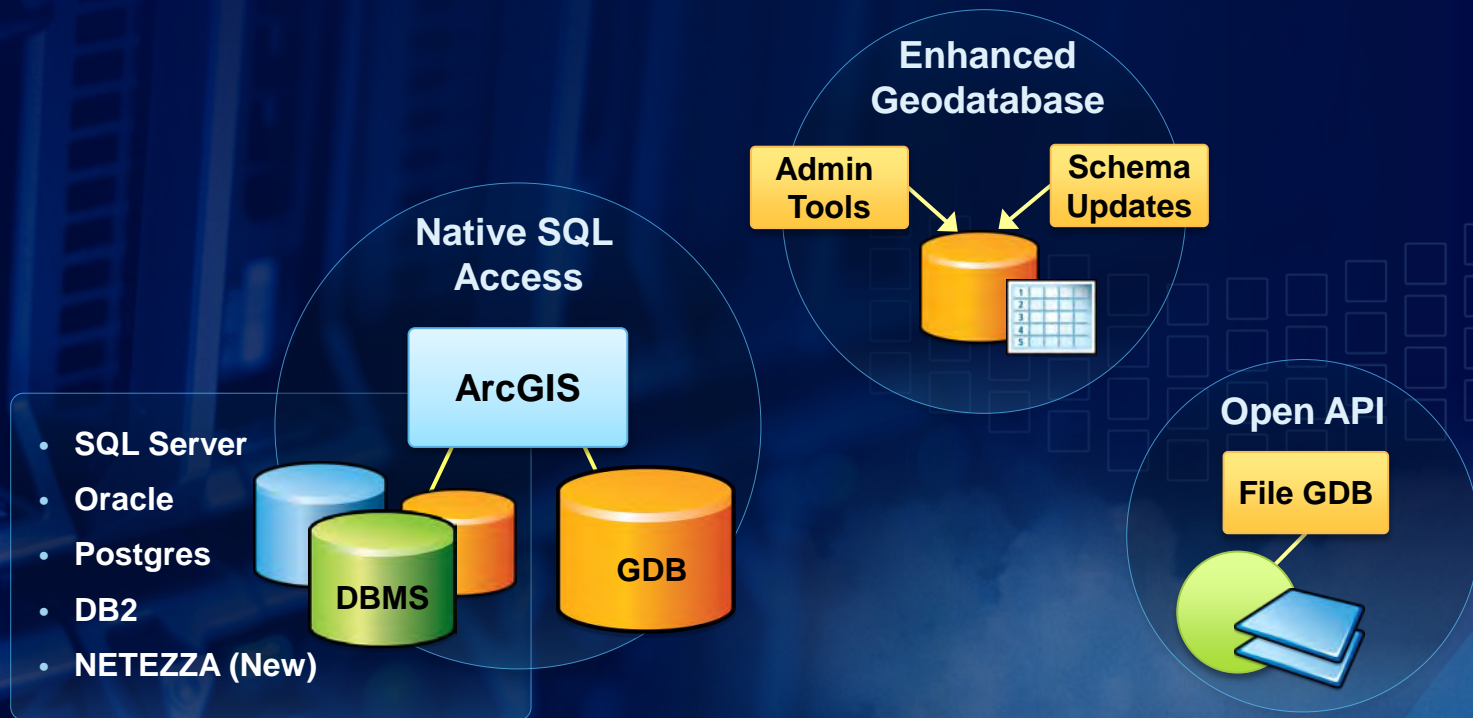

Feature Edit Tracking

... Improving Visualization

Improves Database Management

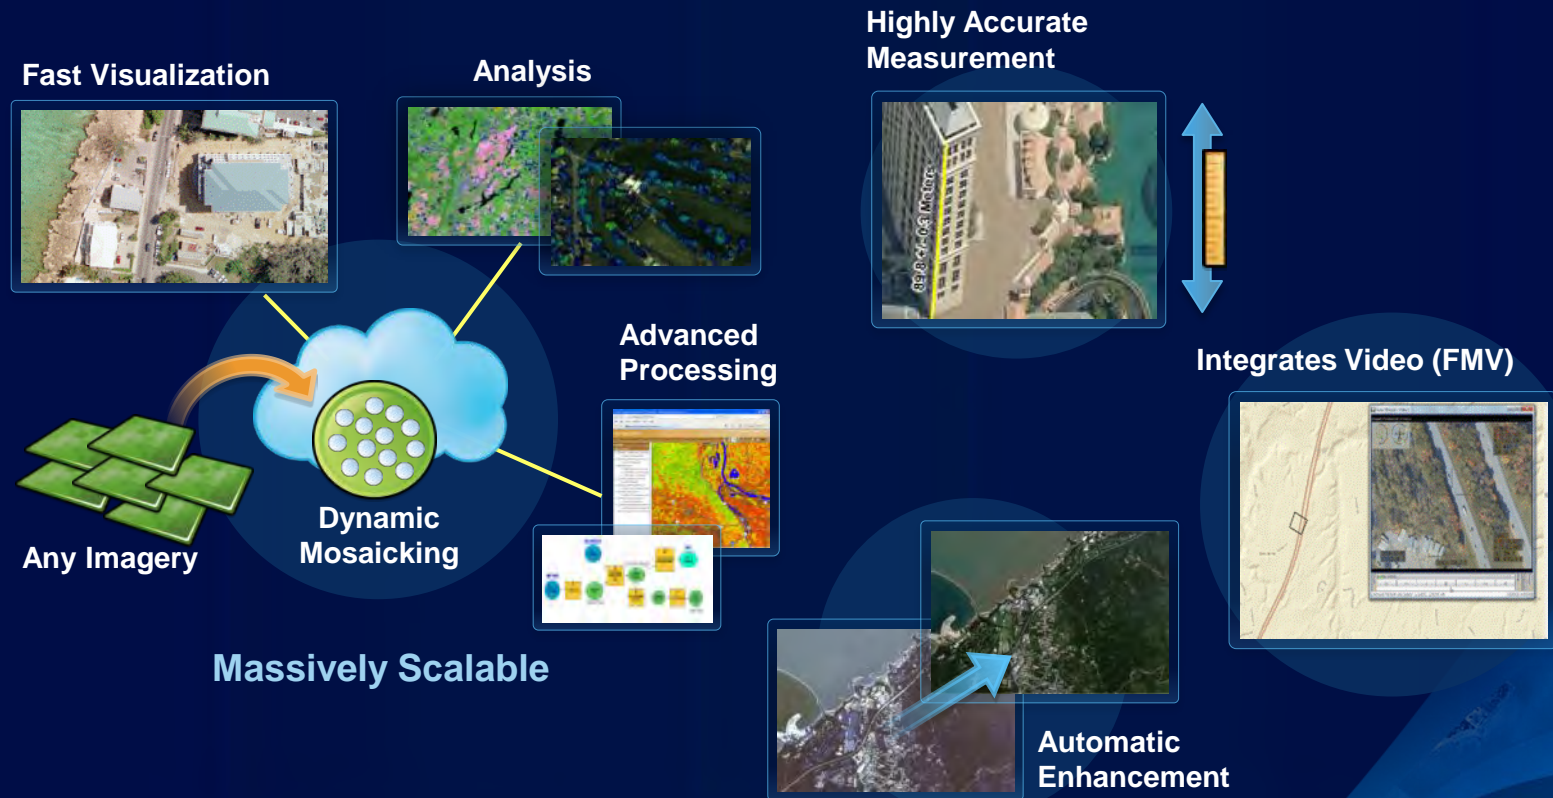

Works Directly with Standard Spatial Databases

... Making Management and Access Simple

Improves Image Integration and Exploitation

Supporting Visualization, Analysis, Management and Dissemination

Simplifies Workflows and Automates Processing

Supports Lidar

Transforms Lidar Data Into Useful Information Products

... Supporting Improved Visualization and Analysis

ArcGIS 10.1 Supports All Popular Mobile Devices

Ruggedized Devices, Smart Phones, Tablets

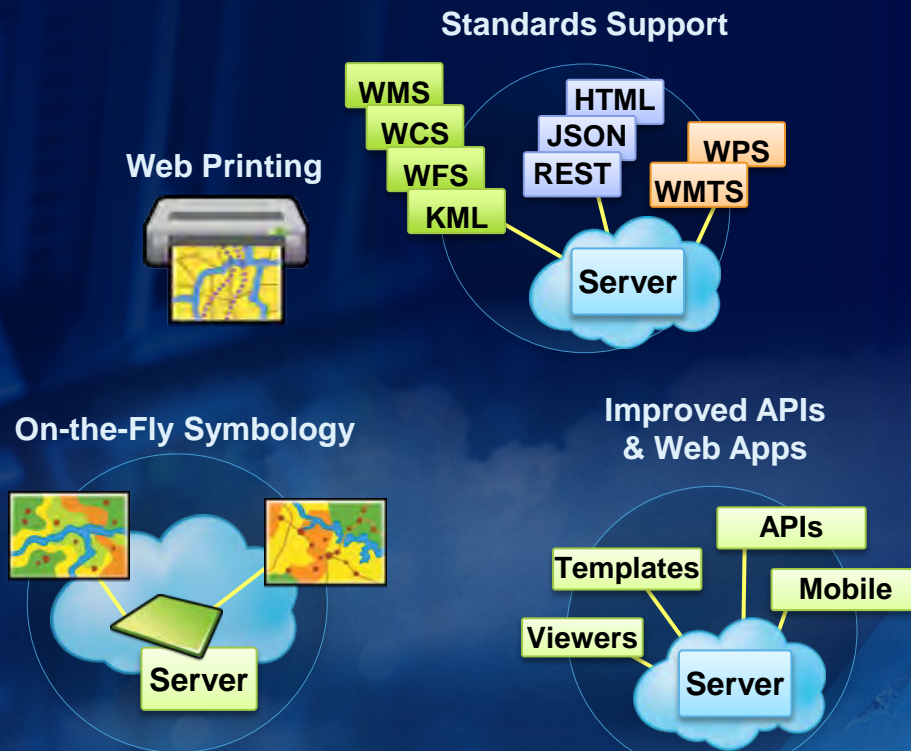

*Connecting with Field-Workers and Citizens . . .
. . . Supporting You Anytime You Are Not at Your Desk*

ArcGIS Server Is Improving

Enhancing the Architecture and Adding Capabilities

- Improved Performance
- Easy Install/Admin
- Simple Service Creation
- Native 64-Bit
- Strong Linux
- Highly Scalable

Providing a More Open and Productive Platform

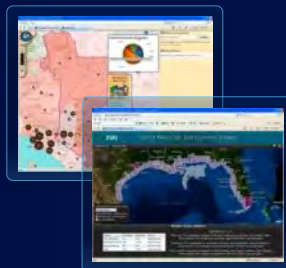

Web Applications Are an Important Part of ArcGIS

Many Web Viewers and APIs

Flex

Silverlight

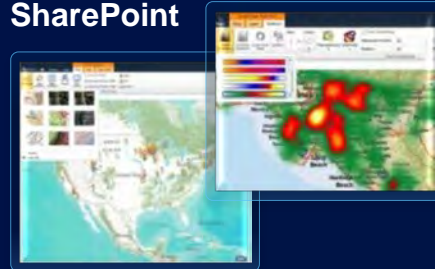

JavaScript

Explorer

SharePoint

*Easily Configured and Deployed
... Fueling an Explosion In Accessibility*

ArcGIS 10.1 Simplifies Sharing Your Work

GIS For Everyone

ArcGIS Online Is a New GIS Pattern

An Open Platform for Maps and Geographic Information

... Easy and Accessible by Everyone

ArcGIS Online Is a Cloud Based GIS

Supporting Online and on Premise Deployment

Basemaps Hosting
Mapping Sharing Open Data
Mobile Groups Templates
User Content Images Geocoding
Applications Any Device Catalog
Web Services Intelligent Maps
Standards Analysis
APIs

ArcGIS Online

Providing GIS as SaaS . . .

. . . For Individuals, Departments, and the Enterprise

Intelligent Web Maps Are the New Medium

Integrating Services (Data, Maps, Models . . .)

Intelligent Maps

Supporting

- Visualization
- Editing
- Pop-ups
- Analysis
- Time

Easily Created
and Shared

*Simplifying GIS . . .
. . . Connecting and Providing Open Access*

Intelligent Web Maps Can Be Used Everywhere

... Enhancing Access and Collaboration

Expands 3D GIS

Improving Modeling, Analysis, and Visualization

Buffers

3D Editing

Performance

Lidar Support

... Supporting Urban Planning, Facility Management, Landscape Planning ...

3D GIS Will Be Advancing Dramatically

Adding Content Generation and Design Tools

Integrating GIS, Urban Design, and Advanced Visualization

CityEngine

Smart 3D cities...

What is CityEngine?

- ✓ Innovative software for fast and easy 3D city modeling;
- ✓ Full suite of industry leading procedural tools to aggregate geospatial data, lay out and edit street networks, subdivide parcels, generate and modify buildings, analyze urban design projects, etc.;

Dynamic City Models

City Modeling by setting rules

Setting rules for:

- ✓ The type of the street network— width of roadways and sidewalks;
- ✓ The parameters for the neighborhood parcels;
- ✓ Height, architecture type, façade type, etc.

OSM Data Import

- ✓ Map selection from OpenStreetMap;
- ✓ Data in CityEngine environment;
- ✓ Processing;
- ✓ Map layer;
- ✓ 3D generation;
